LETS START OUR JORNEY INTO CREATIVITY

Our attentive eye on both present and past trends, combined with our view of design as an experiment, invites us to question and to see each project as a journey of discovery. Along this journey, we have the opportunity to explore, test, and innovate, always seeking a balance between the functionality of spaces and their ability to evoke new perceptions and experiences.

This experimental approach allows us to challenge established norms and explore the unexpected, generating bolder ideas and creative solutions that transcend the conventional.

THE DESIGNER

ABOUT NICOLLE

Brazilian interior designer based in Portugal since 2019, awarded first place nationally by ABD (Prêmio Láurea Máxima).

My work focuses on creating meaningful spaces where concept, function, and atmosphere align. Over the past three years, my studio has developed projects across Portugal and Brazil, supported by a team of designers and architects working collaboratively from concept to execution.

DESIGN

CONCEPT

ART

ABOUT NICOLLE

CASA SENSE marks our entry into the Brazilian market with a clear and confident gesture.

With a contemporary and bold approach, the project explores new textures, refined contrasts, and a carefully chosen point of color that becomes the main highlight of the space.

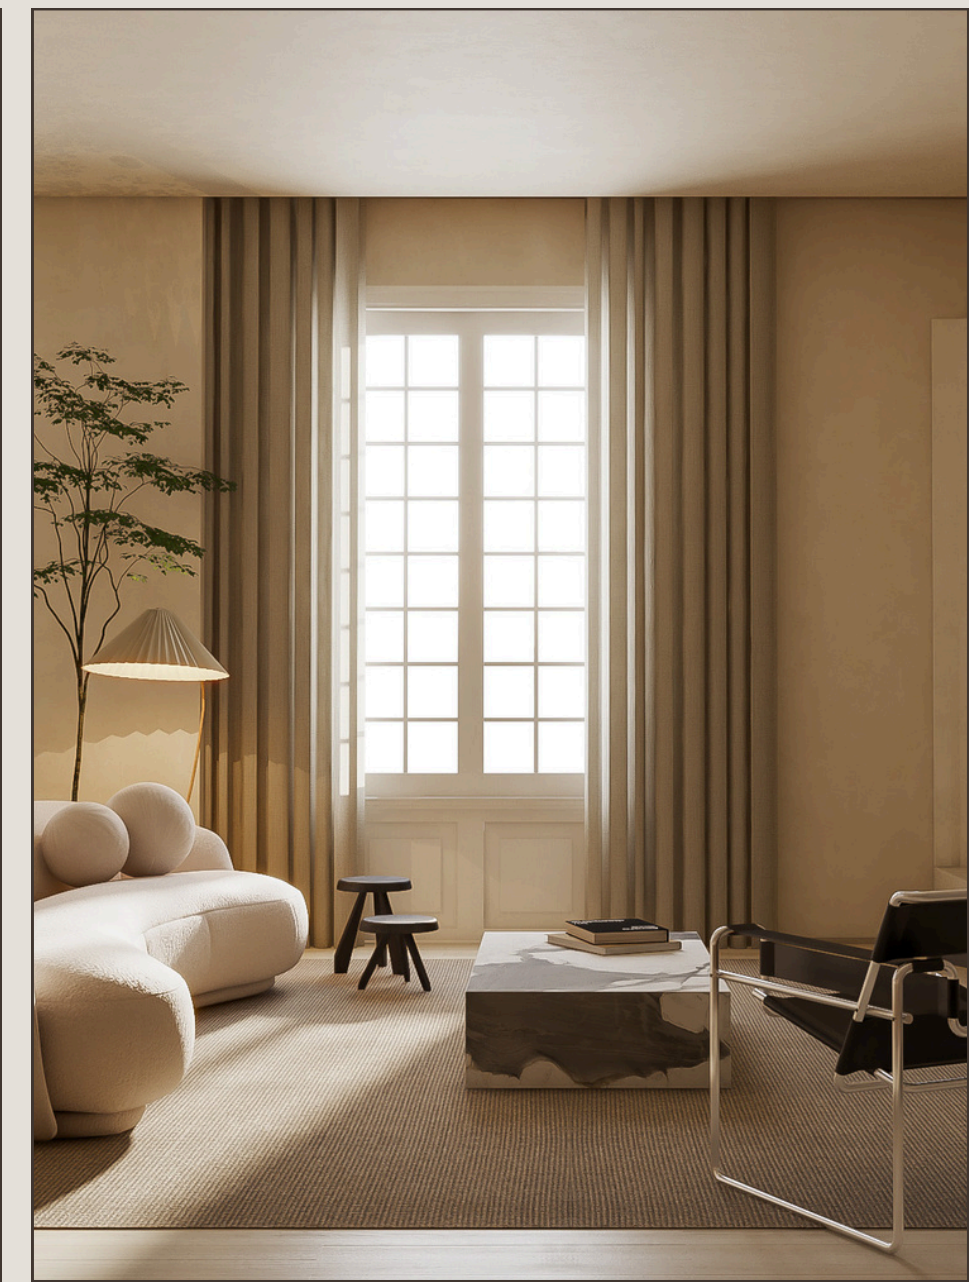

The result is an environment that balances experimentation and function, translating our design vision into a new cultural context.

MONTHLY HIGHLIGHT

HOW IT *WORKS*

Conheça todas as fases do processo que utilizamos para a construção do seu projeto

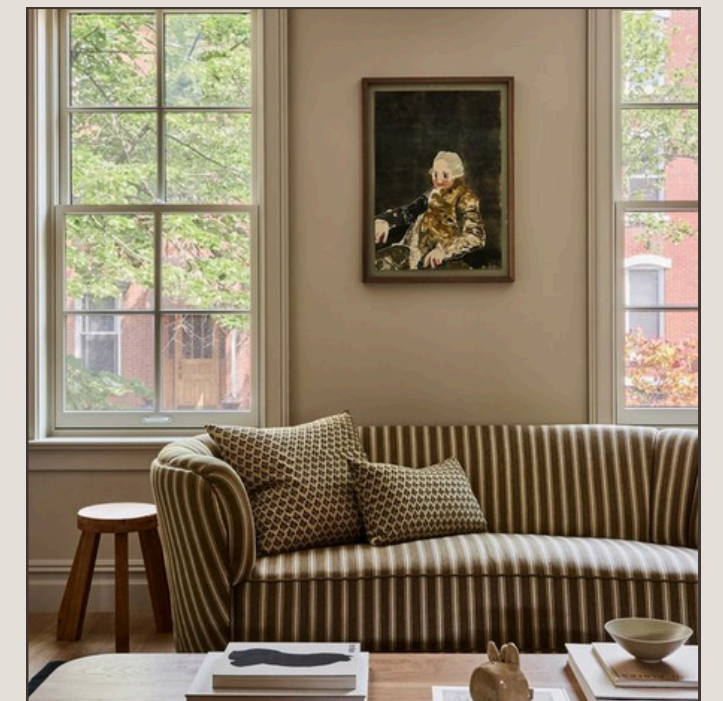

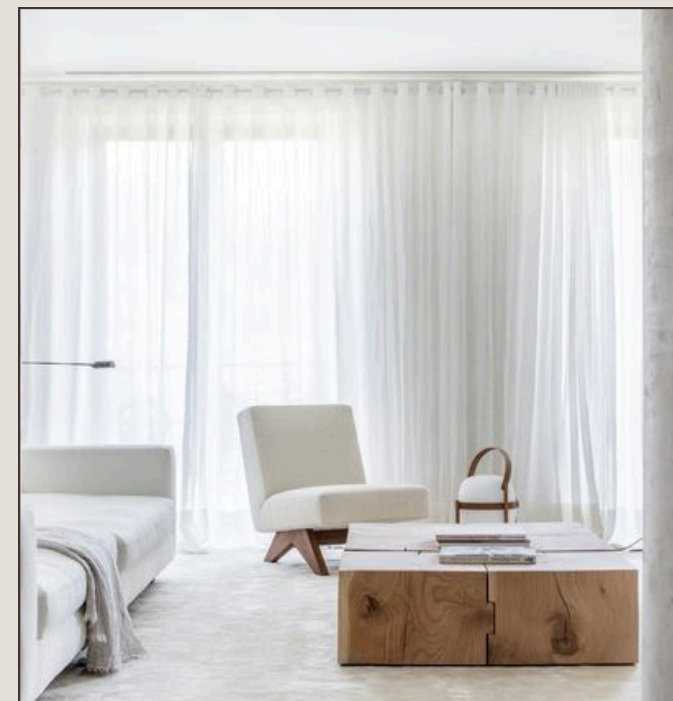

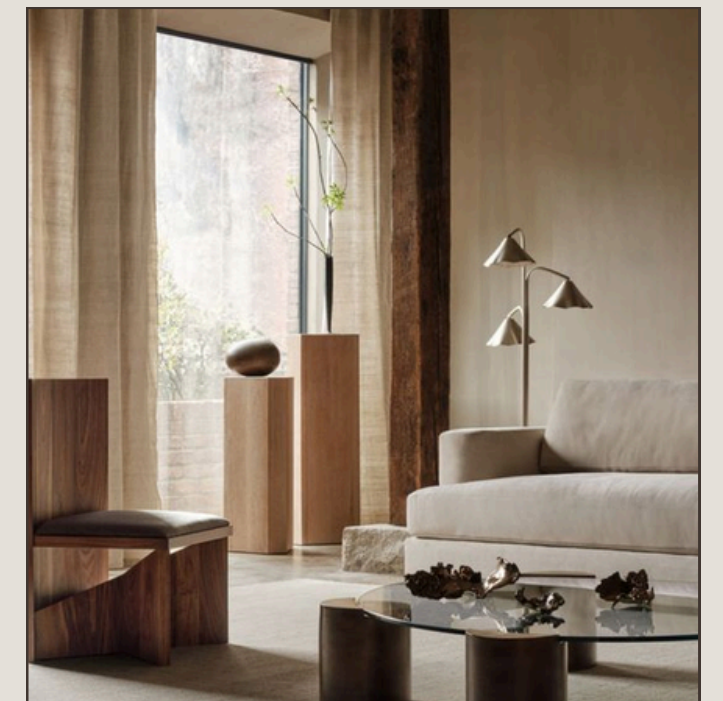

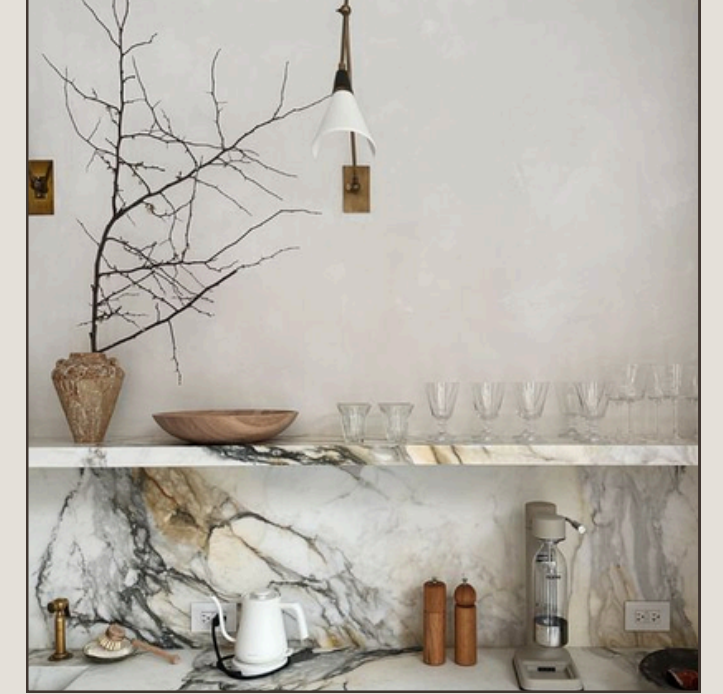

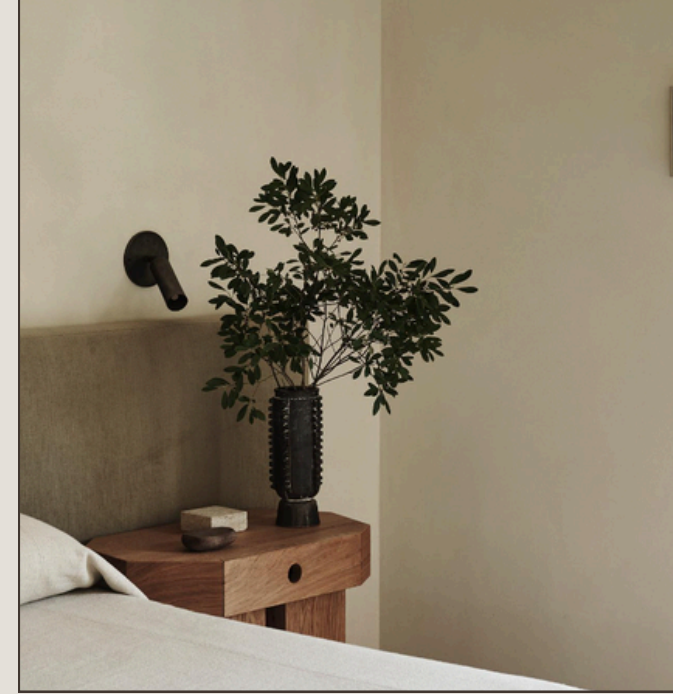

01

FINDING *YOUR* STYLE

At this initial stage, we want you to express how you envision the space and what you feel most connected to.

To support this process, we explore reference images featuring different styles, colors, and materials through curated mood boards, helping to shape and refine ideas around your project.

LAYOUT

02

At this stage, we begin studying furniture layouts and circulation, carefully considering each client's needs, desires, and daily routine.

We always present multiple layout possibilities, allowing the client to clearly understand the space's full potential and feel confident in their decision-making.

the first sketches

03

CONCEITO

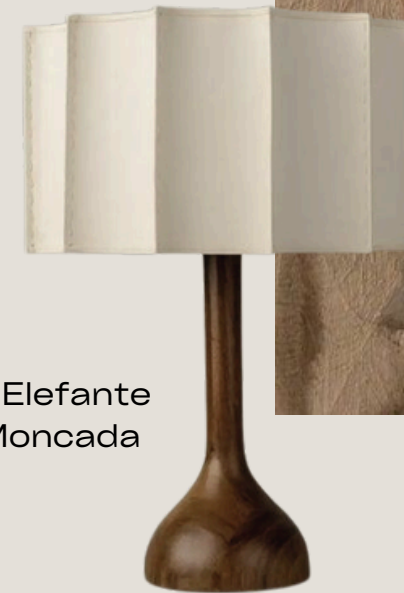

This is when the layout gains full clarity through 3D visualization, allowing the space to be seen as a complete creative proposal, with furniture, décor, finishes, and lighting fully integrated.

04

FURNITURE SELECTION

It is the careful selection of all furniture and décor that will bring the project to life.

Presented through real product photos, this stage allows us to perceive the color and material composition with maximum realism, exploring all viable options so the client can choose what resonates most.

SHOPPING LIST

After selecting pieces through the mood board, we create a complete shopping list to guide the ordering process. Purchases can be made by the client or handled by our team if the order management service is contracted.

EXECUTIVE PROJECT

At this stage, we specify the materials and solutions developed for your project.

We prepare detailed technical plans, including layouts, demolition and construction of walls, ceiling plans, lighting and electrical points. Technical elevations show finishes, while detailed drawings cover carpentry, stonework, and all elements needed to ensure the project is executed exactly as planned.

ORDERS

07

MANAGEMENT

After the shopping list is approved, we proceed with ordering all selected items and carefully plan their deliveries. This way, you avoid the hassle of website registrations, returns or exchanges, delayed shipments, and the many unexpected issues that can arise during this stage.

For a smoother experience, we usually recommend working with a partner warehouse. They receive and store all the client's orders, which avoids any inconvenience during deliveries. Once everything has arrived, they also coordinate the transportation to the site and handle the full installation of all items.

SITE SUPERVISION

We prepare detailed service estimates and recommend the best teams for the execution of the project.

We closely supervise every step with weekly site visits.

Our goal is to oversee the execution process to avoid mistakes, delays, and unnecessary waste. When unexpected situations arise or adjustments need to be made, we manage them carefully and efficiently. With a very detail-oriented approach, we ensure the final result remains faithful to the original design.

DESIGN SERVICES

INTERIOR CONSULTING

This is where we develop the full functionality and creative direction of the apartment through the following stages: Finding Your Style, Layout Study, Furniture Selection, and Shopping List.

INTERIOR DESIGN PROJECT

In addition to the complete study that covers all creative stages and the shopping list, we also develop the 3D project and the full executive documentation required for the execution of more complex projects.

ORDERS MANAGEMENT

It can be added to any package, with the option to include our warehouse service as well.

SITE SUPERVISION

For those seeking greater support during the execution of full or partial renovation projects.
